

# ATTOTOX

ADVANCE TOXIN BINDER CUM MOLD INHIBITOR

## ATTOTOX IS A UNIQUE BLEND OF:

1. Purified Physiliosilicates
2. Yeast Cell wall as MOS
3. Hydrated Sodium Calcium Alumino Silicate
4. Organic Acid
5. Beverage dried yeast
6. Calcium Bentonite
7. Anticaking agents
8. Anti Oxidant

## Features & Benefits

- Prevents mold growth as mold inhibitor
- Effective Range of Mycotoxins
- Prolongs self life of feed ingredients
- Improve Dry matter intake

## Feeding Rate :

100-200 gm/100 kg of cattle feed  
5-10 gm/day/cow or Buffalo or recommended  
by Veterinarian/Nutritionist

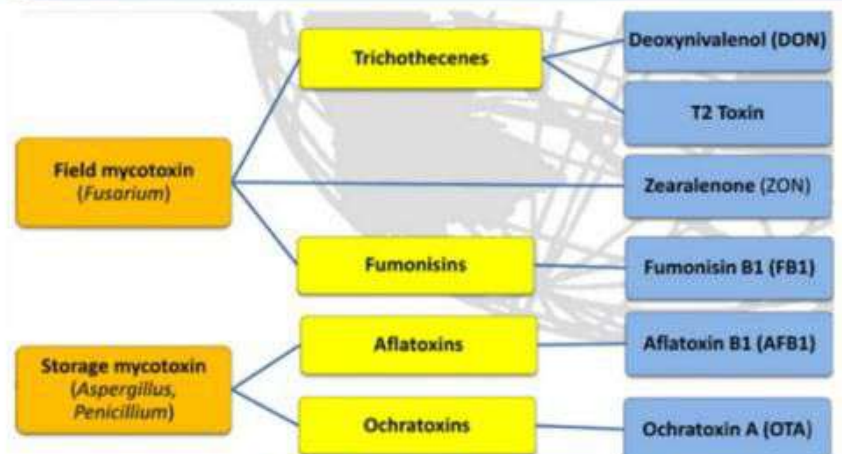

## Presentation :

25 Kg. Bag

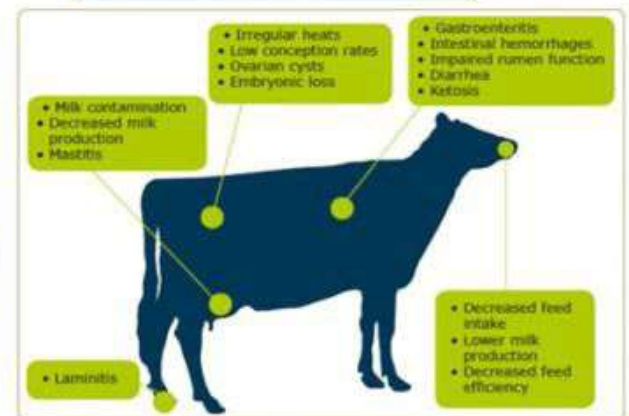

PROPRIETARY ANIMAL FEED SUPPLEMENTS, NOT FOR HUMAN  
USE/MEDICINAL USE (FOR ANIMAL FEEDING ONLY) STORE IN COOL  
AND DRY PLACE, AWAY FROM DIRECT SUNLIGHT

Alleviate the threat of mycotoxin contamination in feeds. Mycotoxins are toxic secondary metabolites of various strains of molds. More than 400 types of mycotoxins are known and FAO estimated that 25% of the world feed cereals are contaminated by mycotoxins.

Mycotoxins can be detected in most forages, cereals and other crops. We can be confident that mycotoxins are present at varying levels in virtually all cattle diets.

## Dueto Mycotoxins Losses

Manufactured & Marketed By:

## ATTOVET NUTRIPHARMA
